

Aligning Grid Items

Align the grid and the items inside it to look like the layout shown below:

1. Use the provided starter to create the layout.
2. The grid container should be `80vw x 80vh` with three rows and three columns creating nine `180px x 180px` cells with `10px` gaps between them.
3. Center the 9 cells in the container.
4. Use the grid alignment and justification properties to position the items in the grid.
